### Create an Account

It is very important to **create a personal account** with **Self-register now** and not to use the Polytechnique generic account.

Once you have registered, you will be automatically logged into your account. This way, in the Web Viewer, you will be able to annotate documents (add personal notes, highlight passages), create a list of favorite documents and make purchase suggestions (wish list).

In the Web Viewer, if you do not see the annotation options, **it means you are logged into the generic Polytechnique account, and not in your personal account** (as seen by clicking on the three dots at the top right of the page and placing the cursor over Sign out). Click on Sign out.

You will be returned to the CSA OnDemand home page. Log out and then log back in with your personal account information.

The image displays two screenshots of the CSA OnDemand website interface.

## Search for a Standard

To see all standards covered by our subscription, click **Content Library** or **My Library**.

CSA OnDemand does not have an advanced search mode. In the search box, enter the standard number or keywords from its title. In the results list, click on the standard number ("parent" of the standard) or on the small arrow to see the active and previous versions ("children") of the standard.

Click on a "child" to access the full text (see the **View Online** and **Download a PDF** sections in this guide).
