

**Julia Rouchet**

Senior Advisor, Project Valorization – TransMedTech Institute & Univalor

---

Julia Rouchet obtained her Master's Degree in Economics in 2008 and in Biology in 2007. She joined the TransMedTech Institute and Univalor in October 2018 as Senior Advisor Valorization. From 2015 to 2018, she worked as a Business Developer at Ingenuity i/o, a French start-up specialized in Human Machine Interface. During that time, she developed and managed the business development as well as partnerships with public research. Prior to this, Julia was the Project Leader at Université Pierre et Marie Curie, the first scientific university in France, where she was responsible for contracts negotiation with industry for the laboratories that were under her management in the field of medical devices and robotics, in an international context (more than 300 contracts for a cumulative amount of approximately 16 million euros). She was also in charge of detecting, analyzing and protecting inventions (about sixty) from these same laboratories. She started her career as a Project Leader at Univalor in 2008.
