

Fanny Barlaam, Ph.D.

Advisor - Project Management– TransMedTech Institut

Fanny Barlaam obtained her master's degree in the field of Neuroscience in 2009. Her academic training continued with a Ph.D. degree in Cognitive Neuroscience of Aix-Marseille University. Obtained in 2013, the research topic focussed on the relation between brain maturation and posture development.

Subsequently, her scientific background was enriched by two postdoctoral experiences, first at the Lyon Neuroscience Research Center in 2014, then at the Research Center of Sainte Justine Hospital in 2017. Her experience in fundamental research led her to focus on the clinical aspect of the brain development in children and adolescent.

Seeking to orient her career in a versatile environment focused on research and innovation, she joined the TransMedTech Institute as a scientific writer. She is involved in TransMedTech's reporting activities and quality management system. She also actively participates in the implementation of co-development projects within the Innovation Co-development Unit. Since September 2020, she has been acting as Project Management Advisor. She manages the execution and progress of R&D projects implemented in the environment of the Living Lab of the TransMedTech Institute.
