

## **Julie Dionne**

Scientific Writer and Project Manager

---

Scientist, entrepreneur and multidisciplinary Project Manager, the atypical career of Julie Dionne is rich in various experiences. Holding a degree in microbiology and a master's degree in virology, Julie also combines university level training programs in project management, marketing and drug development.

Julie began her career as a laboratory technician at the NRC Biotechnology Research Institute for twelve years. For the following five years, she worked as a Project Manager first in clinical research at MDS Pharma, then in telecom at Nortel, and later on as an independent consultant in strategic drug positioning.

Subsequently, Julie joined a firm specialized in claiming R & D tax credits for five years before becoming an entrepreneur in this field. In 2008, she founded Tryacorp with two expert government relations associates, which she successfully chaired for seven years.

Most recently, she held the position of Product Manager, Marketing, first at BSN Medical, a medical devices manufacturer, before joining a Montreal start-up in e-health, Greybox Solutions.
